Mini Downlight Product Data

3W Mini LED Downlight

A fantastic, small, dimmable 3W mini LED downlight, ideal for those small areas that are limited with space, or large areas that require a low light level. They are similar in size to the old MR11 style (slightly smaller). Supplied complete with LED Driver, they are easy and quick to install. With a 36° beam angle and a CRI >85 they provide a nice high quality spread of light at a 4000K (Natural White) or 3000K (Warm White) colour temperature.
