

# POCKET LED

MINI IP65 SPOTLIGHT

This 2W Mini LED Downlight is an excellent choice for spaces with limited room or for larger areas that need low-level lighting. It is slightly smaller than the traditional MR11 style, making it an ideal solution for tight spaces while offering quality illumination. Easy to install, each downlight comes complete with an integrated LED driver. Featuring a 36° beam angle and a CRI >90, these lights provide a soft, even spread of light. You can choose from two colour temperatures: 4000K Natural White for a balanced, neutral light, or 3000K Warm White for a cosy, inviting atmosphere. Perfect for both commercial and residential applications. With an IP65 rating, it is dustproof and protected against water jets, making it suitable for use in both indoor and outdoor environments, such as bathrooms or covered outdoor areas.
